ABSTRACT

This report provides opening 1995 fall headcount enrollment data for Colorado public postsecondary institutions, independent (private, non-profit) institutions, proprietary institutions, and the United States Air Force Academy. Data were derived from annual institutional reports to Colorado, the National Center for Education Statistics, and the state's Student Unit-Record Data System. The report includes historical headcount and full-time equivalent (FTE) data and provides an enrollment outlook for 1995. Findings indicate a decrease in fall headcount enrollment at public postsecondary institutions of 0.2 percent compared to fall 1994; an increase in fall headcount enrollment at two of the three Colorado independent institutions, while enrollment at the other remained unchanged; an increase of 5 percent in enrollment at the United States Air Force Academy, a level still below those of years prior to 1994; an expected increase in 1995-96 in-state FTE enrollment to a level 0.3 percent above 1994-95 enrollment; an expected increase in 1995-96 out-of-state FTE enrollment of 2.4 percent; and an increase of 0.6 percent in total FTE enrollment in 1995-96. Numerous tables and figures present the data and its analysis. (CK)

EXECUTIVE SUMMARY

The Commission collects enrollment data and produces a fall enrollment report annually. The report includes historical headcount and full-time equivalent (FTE) data, and provides an enrollment outlook for the current year. Some of this year's finding are:

- Fall 1995 headcount enrollment at Colorado public postsecondary institutions is 178,830, a decrease of 0.2% compared to fall 1994. This is the third year that opening headcount has decreased. However, this year's decrease was the smallest of the three.

- Fall headcount enrollment at two of the three Colorado independent institutions increased, while enrollment at the other was unchanged.

- Enrollment at the United States Air Force Academy increased 5% but is still below levels prior to 1994.

- 1995-96 in-state FTE enrollment is expected to increase to 117,460, 0.3% above 1994-95 enrollment. According to estimates, the 1995-96 FTE enrollment level will be the third highest ever.

- 1995-96 out-of-state FTE level is expected to increase 2.4% to 21,860, the highest level ever. The out-of-state enrollment rate of change is expected to be significantly higher than the in-state growth.

- Total FTE enrollment, which decreased slightly over the last two years, is expected to increase to 139,320 in 1995-96. This would be the second highest level ever. The 1995-96 rate of increase for total enrollment is estimated to be 0.6%.

INTRODUCTION

This report provides opening fall headcount enrollment data for Colorado public postsecondary institutions, independent (private, non-profit) institutions, proprietary institutions, and the United States Air Force Academy. Headcount enrollment is the actual number of students who enrolled, regardless of the number of classes in which they enrolled. In addition, full-time equivalent (FTE) enrollment is provided for the public institutions. FTE is a calculation of the total number of student credit hours, divided by the number of hours equivalent to a full-time student course load[1]. Data is reported by individual institution, governing board, and institutional type. Also, FTE enrollment is reported by student residency status (in-state and out-of-state).

Reported data is derived from annual institutional reports to the Colorado Commission on Higher Education (CCHE), and the National Center for Educational Statistics. The Commission also collects headcount data from public institutions, and two of the independent institutions, as part of its Student Unit-Record Data System (SURDS). SURDS data is collected at the end of each term and will usually show a higher total headcount than the "opening" headcount reported here.

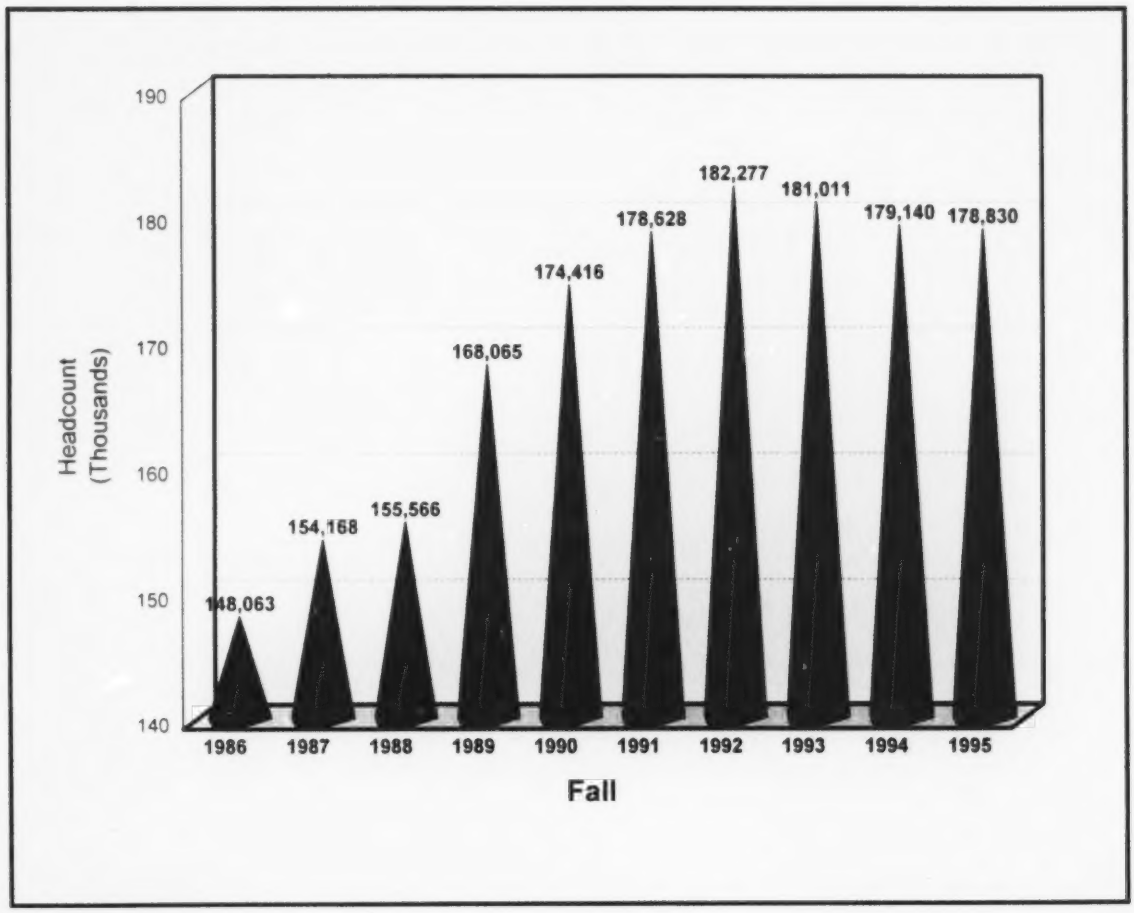
[1]For most institutions, this is 30 credit hours per academic year. For institutions on a quarter system, the divisor is 45 credits.

OPENING FALL HEADCOUNT

Public Postsecondary Institutions

Fall 1995 headcount enrollment at Colorado public postsecondary institutions is 178,830, a decrease of 0.2% compared to fall 1994. This is the third year that opening headcount has decreased. However, this year's decrease was the smallest of the three. Figure 1 shows opening fall headcount from 1986 to 1995.

Figure 1
Opening Fall Headcount Enrollment
Colorado Public Institutions



At the board level, the changes ranged from a 1.8% increase for the State Board of Agriculture instutitions to a 3.7% decrease at the Local District Colleges. Headcount enrollment increased at 8 of the 14 four-year institutions but only 4 of the 15 two-year colleges. Tables 1 and 1A provide the opening headcount data at each institution.

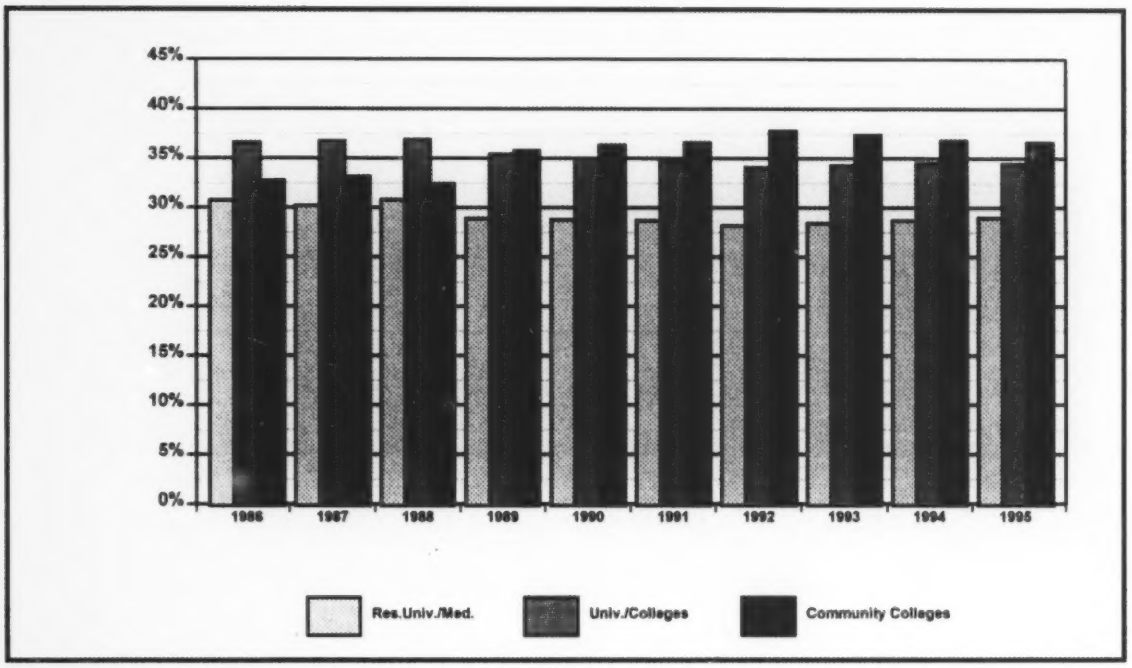
Figure 2 displays the distribution of headcount enrollment by institutional type[1] for the public institutions. Between 1986 and 1992, the community college enrollment share increased while the other two sectors decreased. In 1989, the community college share exceeded the universities and colleges share for the first time. Over the last three years, however, the community college share decreased while the research university/medical sector increased slightly.

Figure 2
Headcount Enrollment
Distribution by Institutional Type



When interpreting headcount data, it is important to note that institutions report enrollment to CCHE early in the academic term. For example, community colleges offer many courses that start after the reporting date, or are open to enrollment throughout the term. These institutions will have a higher headcount at the end of the fall term. Since the data is collected at the same time each year, however, multi-year comparisons are a good indicator of enrollment trends.

---

[1] Research Universities/Medical include the Colorado School of Mines, Colorado State University, Colorado State University - Professional Veterinary Medicine, the University of Colorado - Boulder, and the University of Colorado - Health Sciences Center.

Universities and Colleges include all other public four-year institutions in the state.

Community Colleges include the CCCOES institutions and the local district community colleges.

Independent (private, nonprofit) Postsecondary and Federal Institutions

Fall 1995 enrollment at Regis University and The Colorado College are both up 3.2% from Fall 1994, while the University of Denver enrollment is the same as last year. Enrollment at the United States Air Force Academy increased 5% but is still below levels prior to 1994. This year's increase is not expected to continue as the military academies adjust to the decrease in military forces.

Area Vocational Schools and Proprietary Postsecondary Institutions

Area vocational schools and proprietary institutions provide varied programs, including certificates through master's and first-professional degrees, and annually report enrollment data to CCHE and the National Center for Education Statistics through the Integrated Postsecondary Education Data System (IPEDS) survey. The four area vocational schools reported fall 1995 enrollment of 6,739. Fall 1995 data for the Colorado proprietary institutions is not currently available. Data from last year indicates an enrollment of 18,097 for 102 institutions. Their enrollment ranged from 2 to 2,004 students. While enrollment information about these institutions is limited, it is important to note the service they provide to a large number of individuals.

FULL-TIME EQUIVALENT (FTE) STUDENTS

Public institutions also report the number of student credit hours taken by students reported on the opening fall headcount report. The fall data is used to estimate full-time equivalent (FTE) student enrollment for the current fiscal year. Since FTE student enrollment is used in the budget process, an early indication of the total enrollment for the current fiscal year is useful in evaluating budgetary impact.

Table 2 compares the 1994-95 FTE estimates with the actual 1994-95 FTE by board. Last year's report over-estimated the final in-state FTE by 0.6% (117,844 FTE estimate versus 117,143 final, a difference of 701 FTE). The in-state estimates ranged from a 0.6% under-estimate for the Trustees of the Colorado School of Mines, to a 1.6% over-estimate for the Trustees of the University of Northern Colorado.

The out-of-state estimates ranged from a 7.3% under-estimate for the Local District Colleges to a 2.4% over-estimate for the Regents of theUniversity of Colorado. Statewide, the out-of-state estimate was 0.6% above the actual levels.

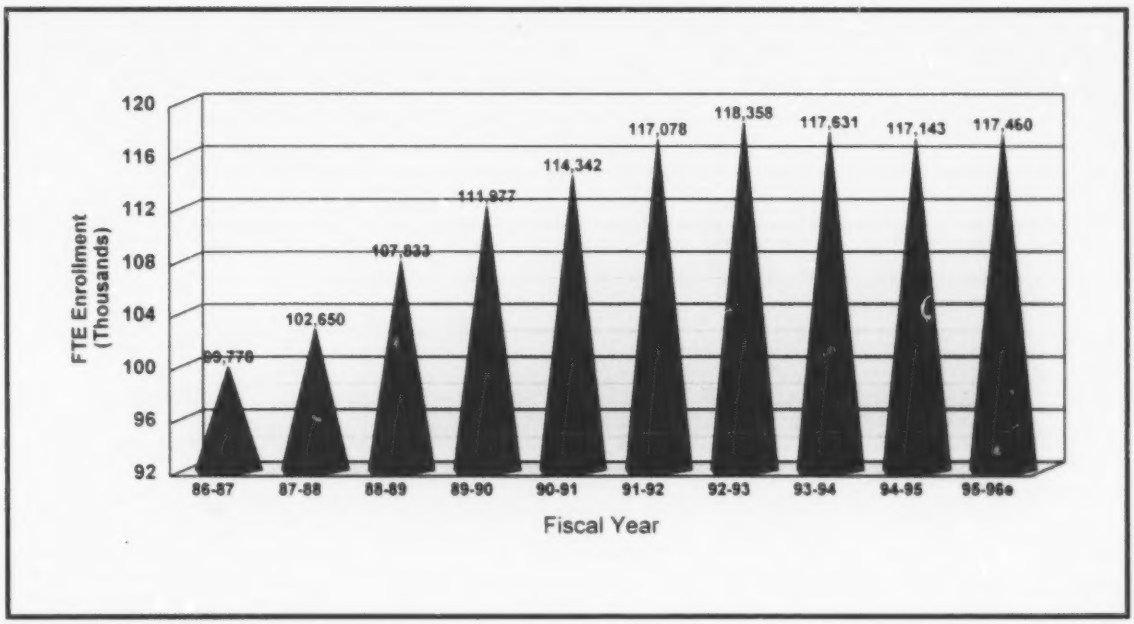
In-State Full-Time Equivalent Enrollment

1995-96 in-state FTE enrollment is expected to increase to 117,460, 0.3% above 1994-95 enrollment. The increase this year will be the first since 1992-93. Figure 3 displays the in-state FTE enrollment change since 1986-87. According to estimates, the 1995-96 FTE enrollment level will be the third highest of the last 10 years. Tables 3 and 3A provide in-state FTE student data for all public institutions from 1986-87 to 1995-96 (Estimated). These tables provide the actual level and percent change by institution and summary group.

In the four-year sector, 10 of 14 institutions have increasing enrollment. Fort Lewis College is increasing at the highest rate (3.5%). In the two-year sector, 8 of the 15 two-year institutions are increasing. Front Range Community College (9.4%) has the highest rates, however, part of that increase reflects the combining of the Boulder Valley Area Vocational School with Front Range.

Figure 3
In-State Full-Time Equivalent Enrollment
Colorado Public Institutions



Enrollment by Summary Group

Enrollment is increasing in 4 of the 7 summary groups (board/local district). The Trustees of the Colorado School of Mines and the State Board of Agricuture institutions are expected to increase at the highest rates, 2.8% and 1.5%, respectively. The Board of Trustees of the University of Northern Colorado and Regents of the University of Colorado are expecting enrollment to be down 1.3% and 1.2%, respectively.

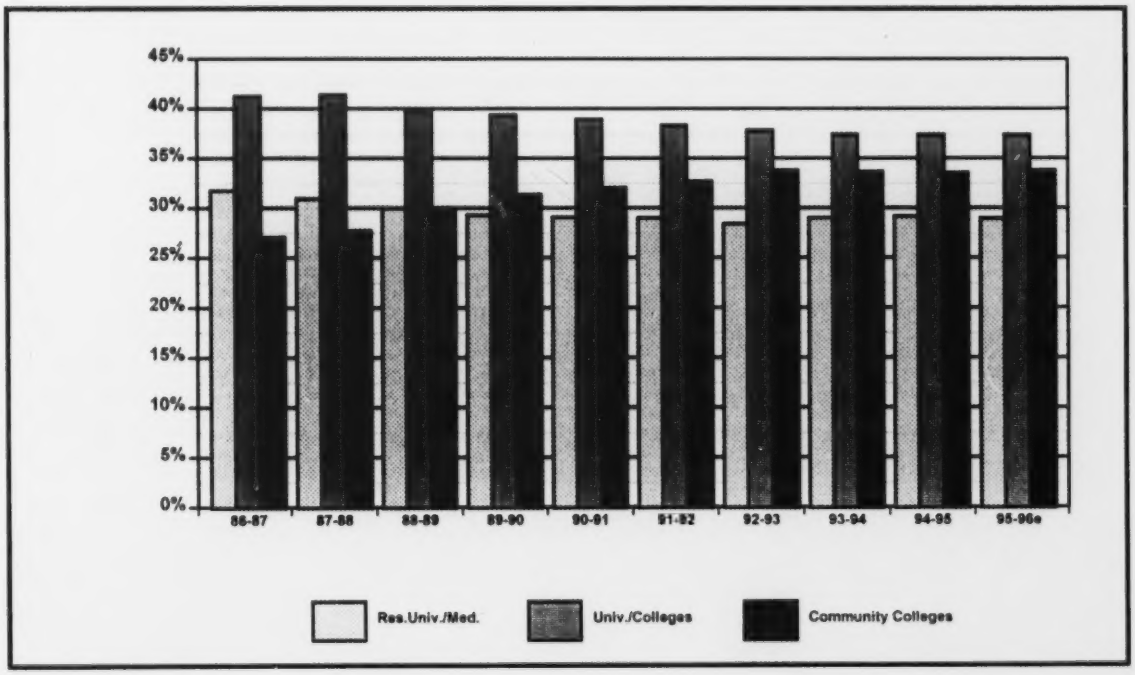
Enrollment by Institutional Type

Community colleges share of headcount enrollment (all students without regard to class load) exceeds both the other sectors (see Figure 2). In FTE (a calculation of the total number of student credit hours divided by the number of hours equivalent to a full-time student course load) the universities and colleges are projected to have the largest share of in-state enrollment, 37.3%, compared to the community colleges, 33.8%, and the research universities/medical institutions, 28.9%, for 1995-96. Between 1986-87 and 1992-93, the community college share of enrollment increased, and exceeded the research universities/medical share for the first time in 1989-90. Since 1993-94, the in-state FTE distribution of the sectors has not changed significantly.

Figure 4
In-State FTE Enrollment
Distribution by Institutional Type



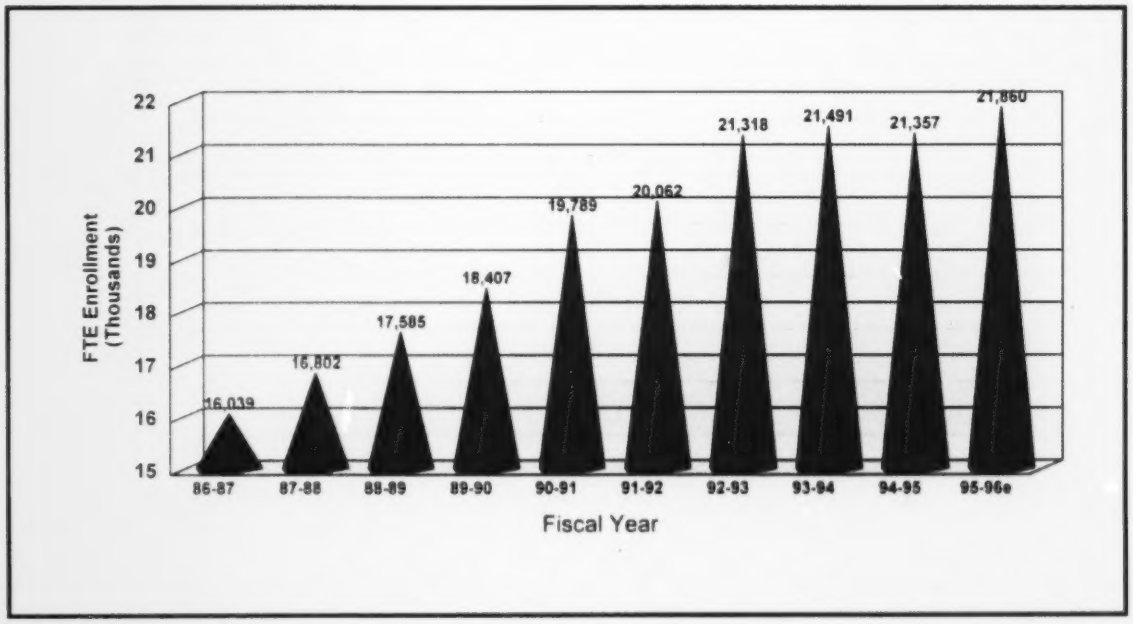
Out-of-State Full-Time Equivalent Enrollment

Out-of-state FTE is expected to increase this year to the highest level ever. Figure 5 shows the out-of-state enrollment change since 1986-87. The 1995-96 level is expected to increase 2.4% to 21,860. Tables 4 and 4A provide out-of-state FTE student data for all public institutions from 1986-87 to 1995-96 (Estimated). These tables provide the actual level and percent change by institution and summary group.

Out-of-state enrollment is increasing at all but 1 of 14 four-year. Change in the two-year institutions is mixed with about half increasing and half decreasing. The total out-of-state enrollment rate of change is expected to be significantly higher than the in-state growth.

While the out-of-state enrollment is a small part of community colleges total enrollment, community colleges experienced significant increases between 1989-90 and 1994-95. That trend is expected to end this year as out-state enrollment at the community colleges decreases from 2,846 in 1994-95 to 2,760 this year.

Figure 5
Out-of-State Full-Time Equivalent Enrollment
Colorado Public Institutions



Enrollment by Summary Group

6 of the 7 summary groups (board/local district) are experiencing out-of-state enrollment growth this year. The largest increases are expected at the State Board of Agriculture and Board of Trustees of University of Northern Colorado, up 4.6% and 3.9%, respectively. Out-of-state enrollment at the Colorado Community College System is expected to decrease over 5%.

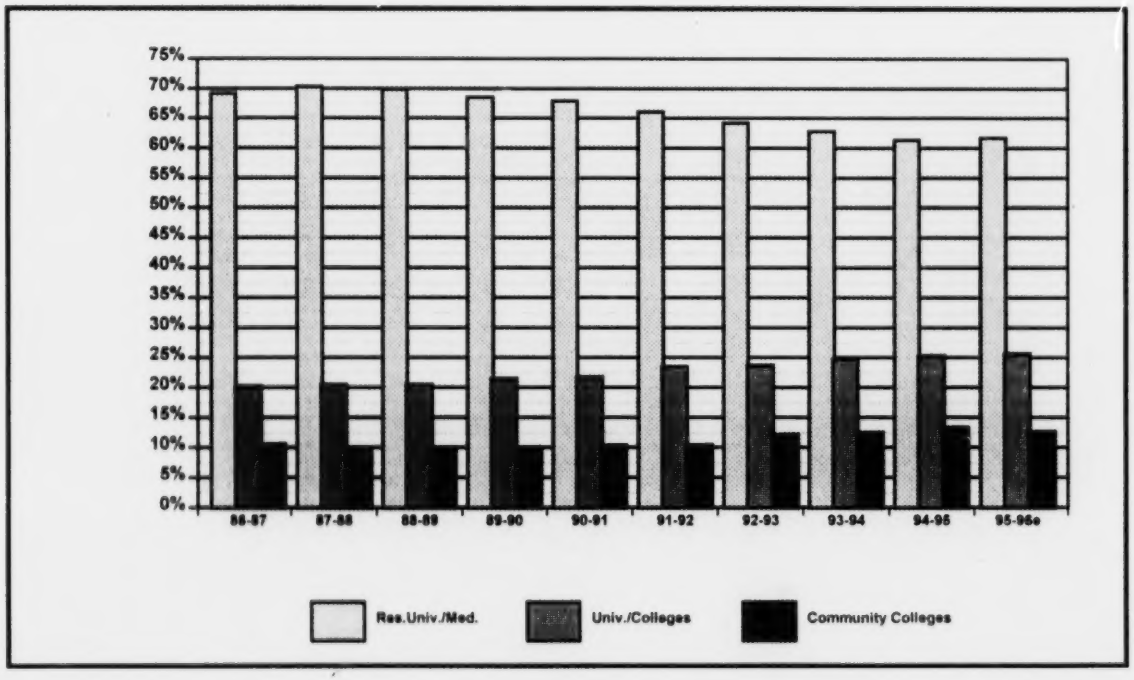
Enrollment by Institutional Type

In 1995-96, the research universities/specialized medical institutions accounted for the largest share of out-of-state enrollment, 61.8%, compared to the universities and colleges, 25.6%, and the community colleges, 12.6%. Between 1987-88 and last year, the research universities/medical institutions share of out-of-state enrollment decreased. This year, that sector's share of out-of-state enrollment is increasing. This is the first year since 1988-89 that the community college share decreased. Figure 6 shows the distribution of out-of-state FTE by institutional type for ten years.

Figure 6
Out-of-State FTE Enrollment
Distribution by Institutional Type

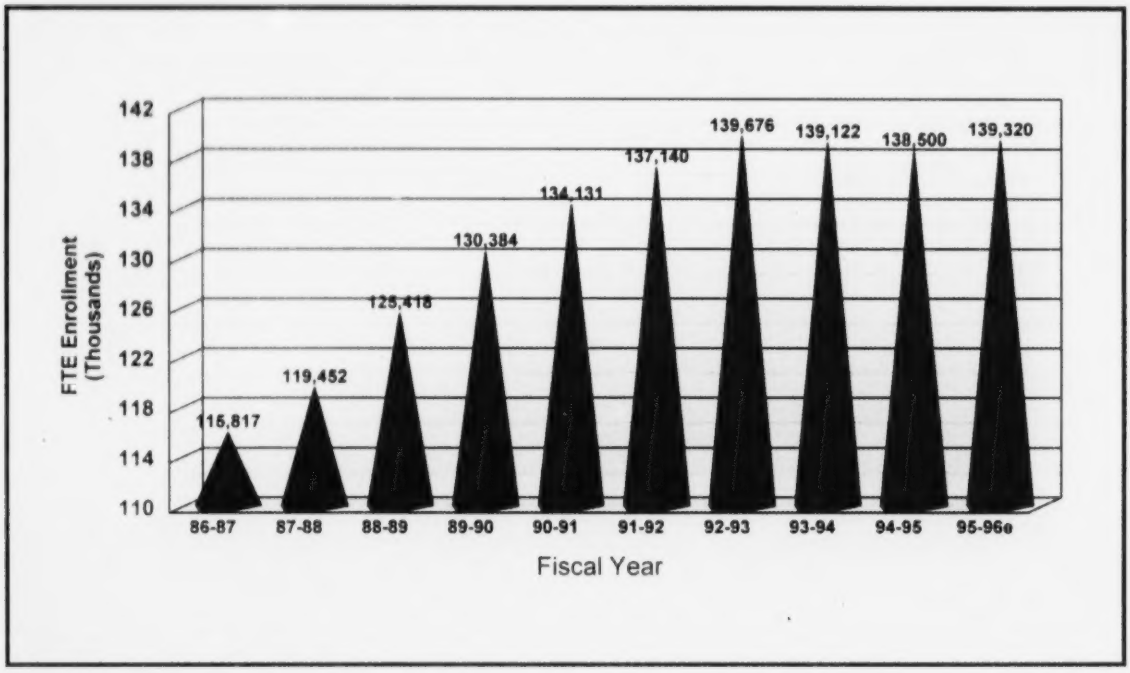


Total Full-Time Equivalent Enrollment

Total FTE enrollment is projected to increase at 17 of 29 public postsecondary institutions during 1995-96. Increases range from 0.2% at the University of Colorado - Health Sciences Center to 10.1% at Front Range Community College. Tables 5 and 5A provide total FTE student data for all public institutions from 1986-87 to 1995-96 (Estimated). These tables provide the actual level and percent change by institution and summary group.

Total FTE enrollment, which decreased slightly over the last two years, is expected to increase to 139,320 in 1995-96. This would be the second highest level ever (Figure 7). The 1995-96 rate of increase for total enrollment is estimated to be 0.6%.

Figure 7
Total Full-Time Equivalent Enrollment
Colorado Public Institutions



Enrollment by Summary Group

Total FTE enrollment at 5 of the 7 summary groups (board/local district) is up from last year. The largest increase is 2.5% at the Colorado School of Mines, followed by the State Board of Agriculture increase of 2.3%. The Regents of the University of Colorado and the Board of Trustees for the University of Northern Colorado are expecting slight decreases.
